## PROFESSIONAL SUMMARY

Full-stack web developer with strong expertise in frontend and backend development, specializing in React.js, Next.js, TypeScript, and Laravel (PHP). Experienced in building production-level applications including scalable user interfaces, secure RESTful APIs, and role-based authentication systems.

## EDUCATION

### AGMR College of Engineering

*Bachelor of Engineering in Electrical & Electronics*

Varur, Hubli

Nov. 2021 – Jul. 2024

## EXPERIENCE

### Associate Software Developer

*7Croe Technologies*

Aug. 2024 – Sep. 2025

*Hubli, India*

- Developed full-stack web applications using React.js, Laravel (PHP), and MySQL for real-world clients.
- Designed and implemented secure RESTful APIs for real estate, e-commerce, referral, and course management platforms.
- Built secure authentication systems using Laravel Sanctum, JWT, OAuth (Google & Apple), and RBAC.
- Designed backend architecture including database schemas, controllers, services, middleware, and API routing.
- Integrated Razorpay payment gateway and SMS notifications for real-time transaction and communication workflows.
- Improved backend performance using Redis caching, queues, and background jobs.
- Implemented validation, authorization flows, structured error handling, and optimized API responses.
- Tested and validated APIs using Postman ensuring correct HTTP status codes and reliability.
- Successfully delivered 5+ full-stack applications from requirement analysis to production deployment.

## PROJECTS

### Real Estate Management Platform | *React.js, Context API, Laravel, MySQL, Redis, RBAC, GSAP* | [GitHub](#)

- Engineered a scalable platform to manage properties, agents, clients, bookings, and financial transactions.
- Implemented global state management using React Context API for authentication, user roles, and shared application data.
- Implemented Role-Based Access Control (Admin, Manager, Agent, User) across frontend dashboards and backend APIs.
- Developed full data lifecycle management including Create, Update, Delete, Soft Delete, Force Delete, Restore, and Bulk operations.
- Built advanced filtering, searching, sorting, and pagination features improving usability and performance.
- Optimized backend performance using eager loading, caching, and background job processing improving performance by 35%.
- Integrated Excel import/export, PDF generation, and email notifications with Redis queues and Horizon.
- Designed advanced UI animations and transitions using Framer Motion and GSAP to enhance user experience.
- Documented REST APIs using Swagger / OpenAPI improving developer productivity and maintainability.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

**Frontend:** React.js, Next.js (Basic), Redux Toolkit, Tailwind CSS, Bootstrap, Material UI, Framer Motion, GSAP

**Backend:** Laravel, REST API Development, Sanctum, JWT, MVC Architecture

**Authentication & Security:** OAuth (Google & Apple), RBAC, bcrypt Password Hashing, API Security

**Databases:** MySQL, Redis

**Tools:** Git, GitHub, Postman, Redis, VS Code, Figma

**Concepts:** REST APIs, Clean Architecture, Performance Optimization, API Security, Agile/Scrum
